Facts
About
Our
Moon ...

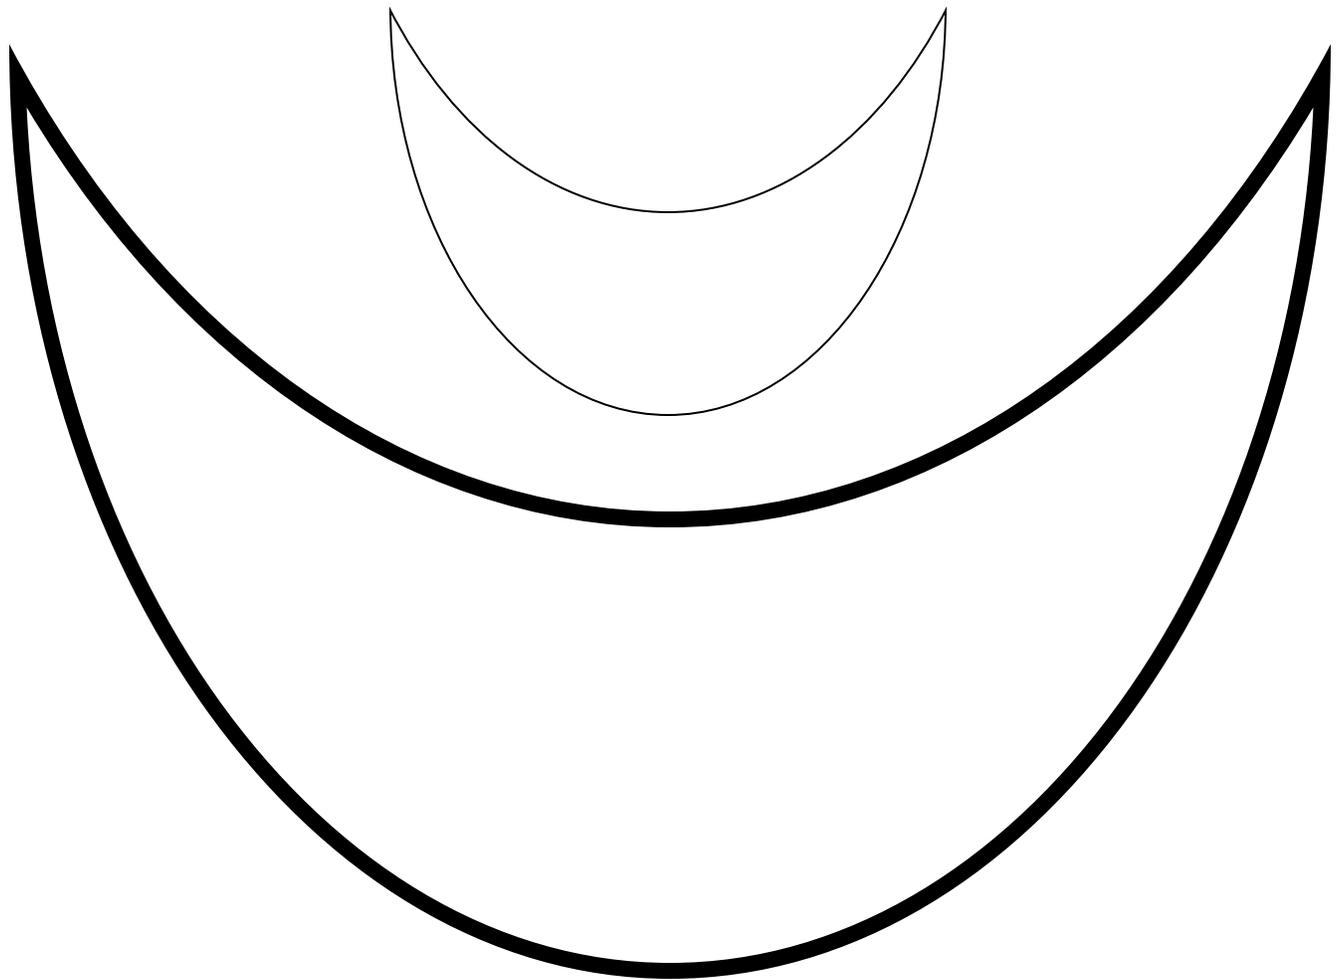

The Moon
Is Earth's
satellite.
It orbits
the Earth
in about
28 days...

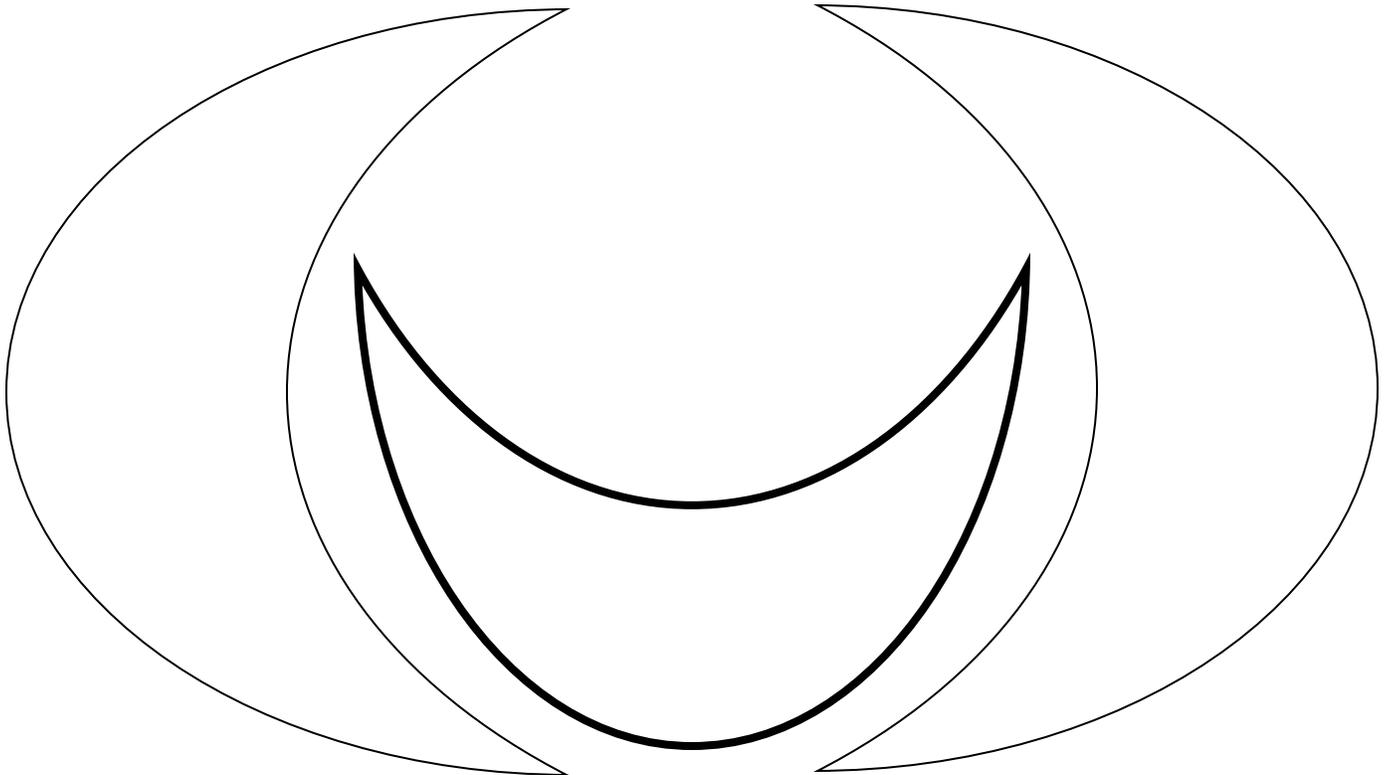

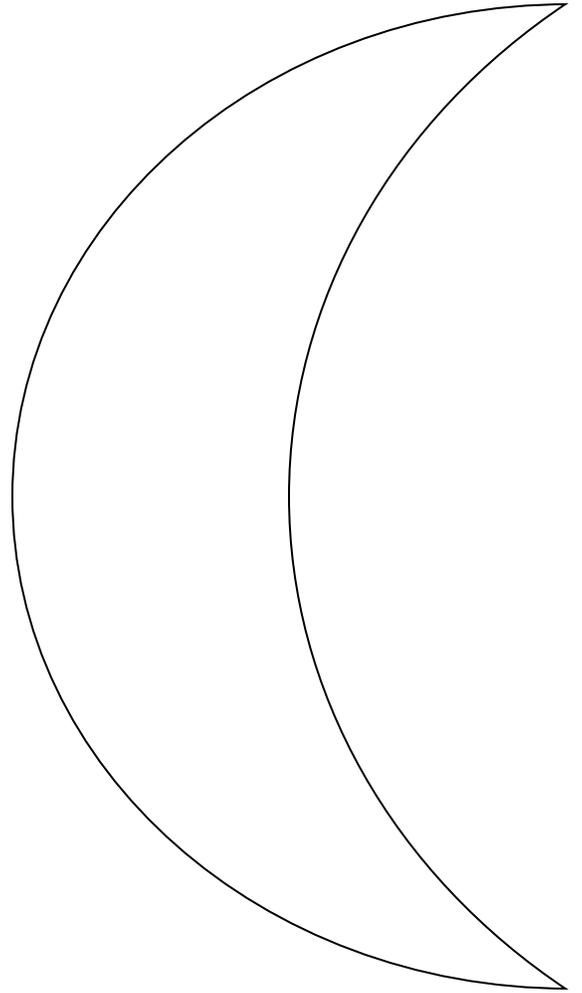

The Moon
was formed
about 4,5
billion
years ago..

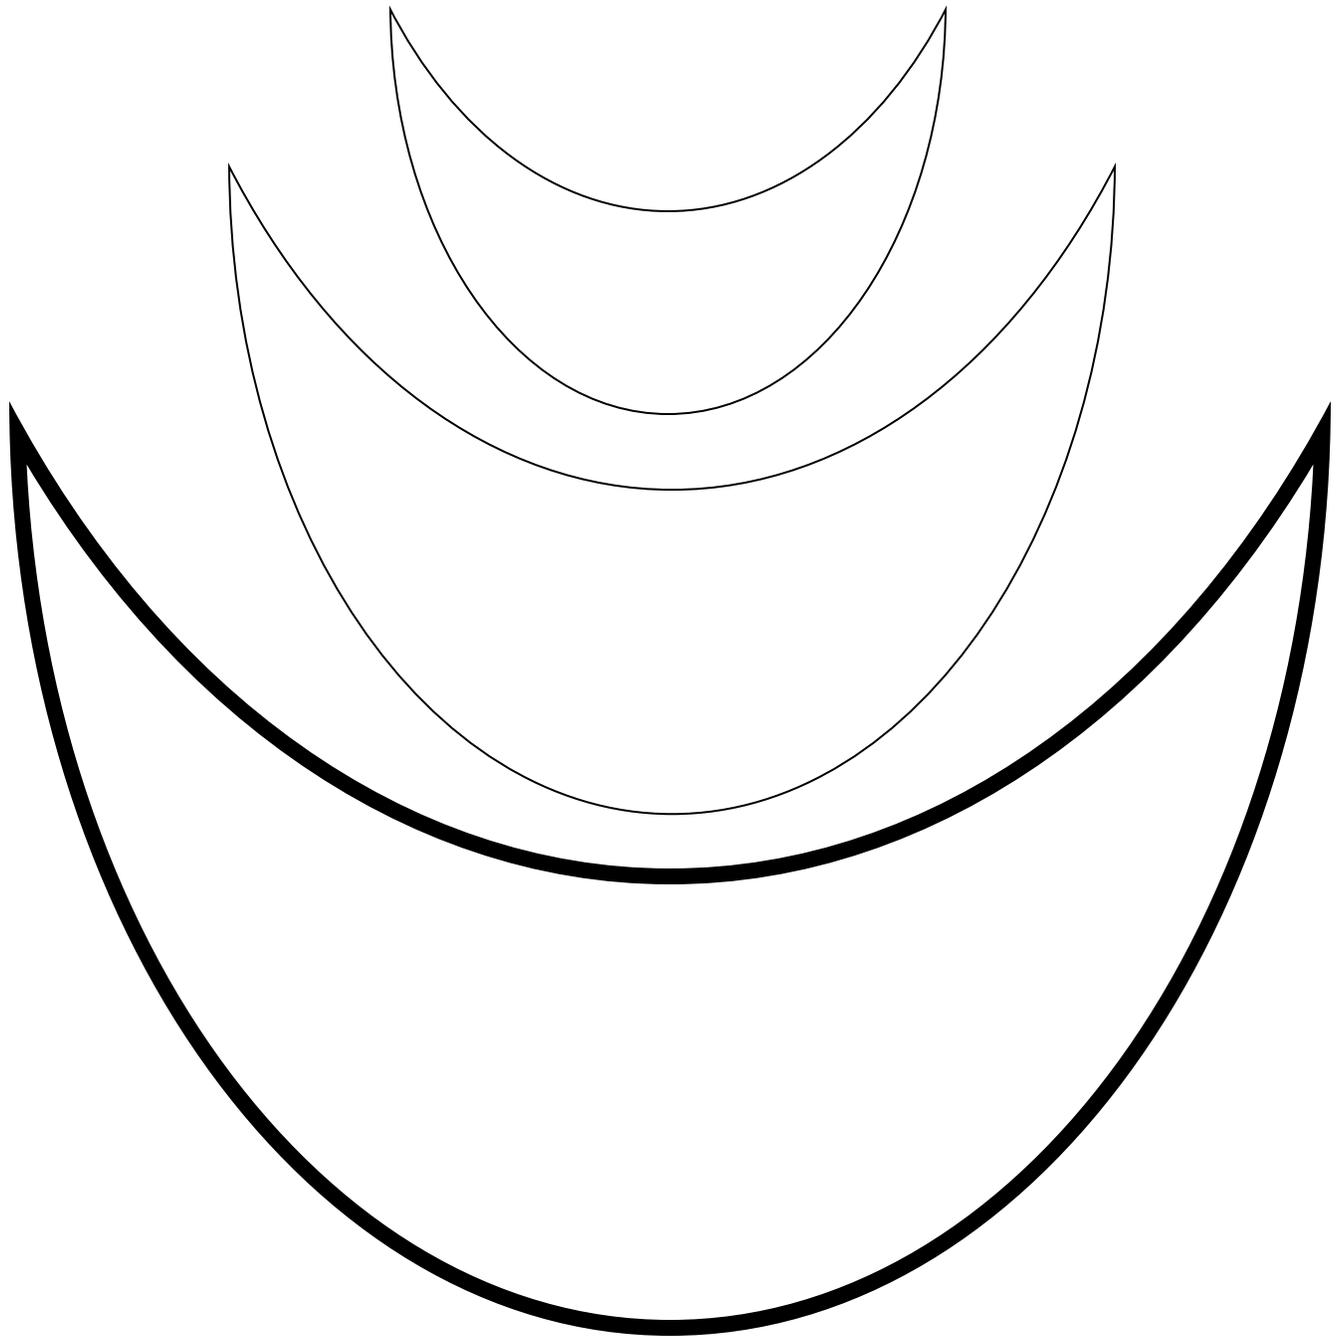

The Moon
is rotating
so as the
same side
is always
facing the
Earth...

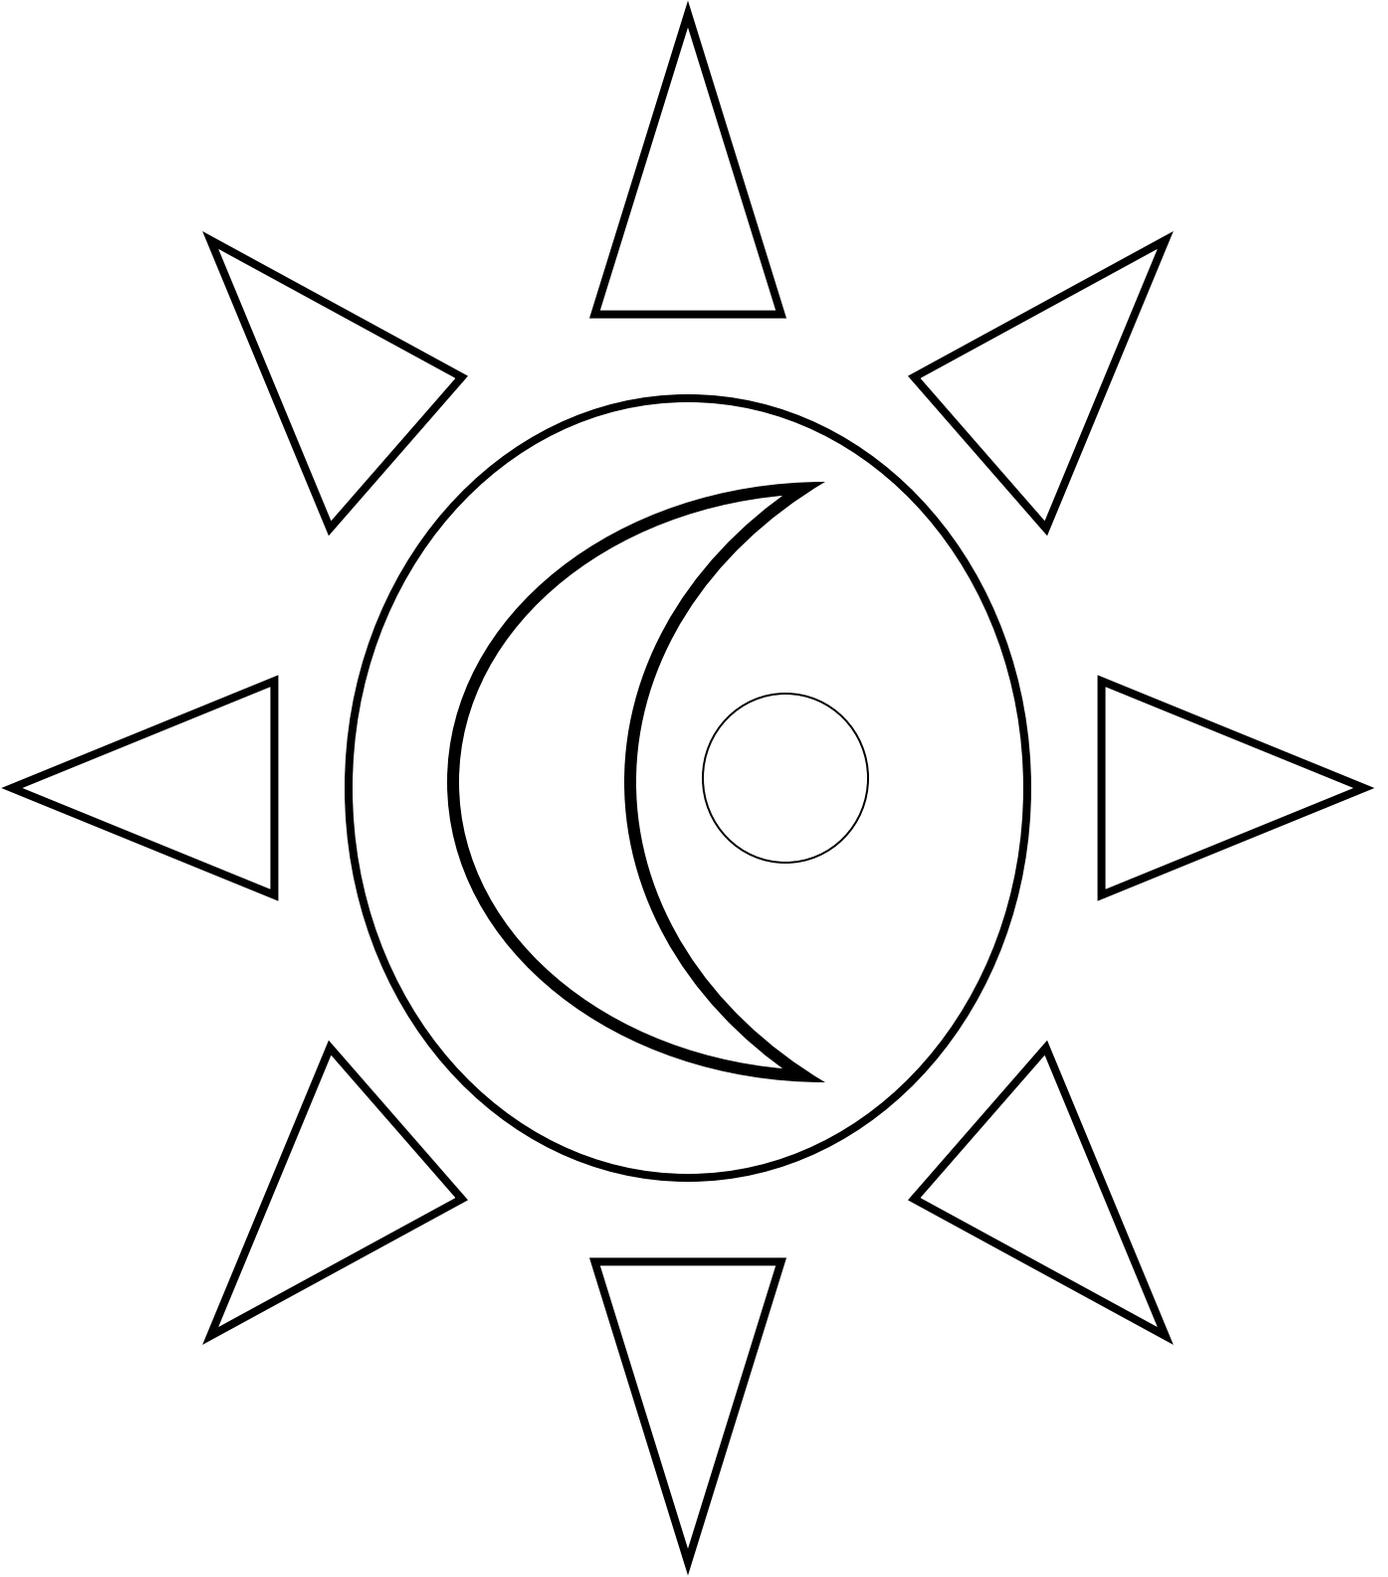

The Moon has a diameter of about 3500 Km (1800 Miles) & orbits the Earth from a distance of about 385000 Km (200000 Miles)

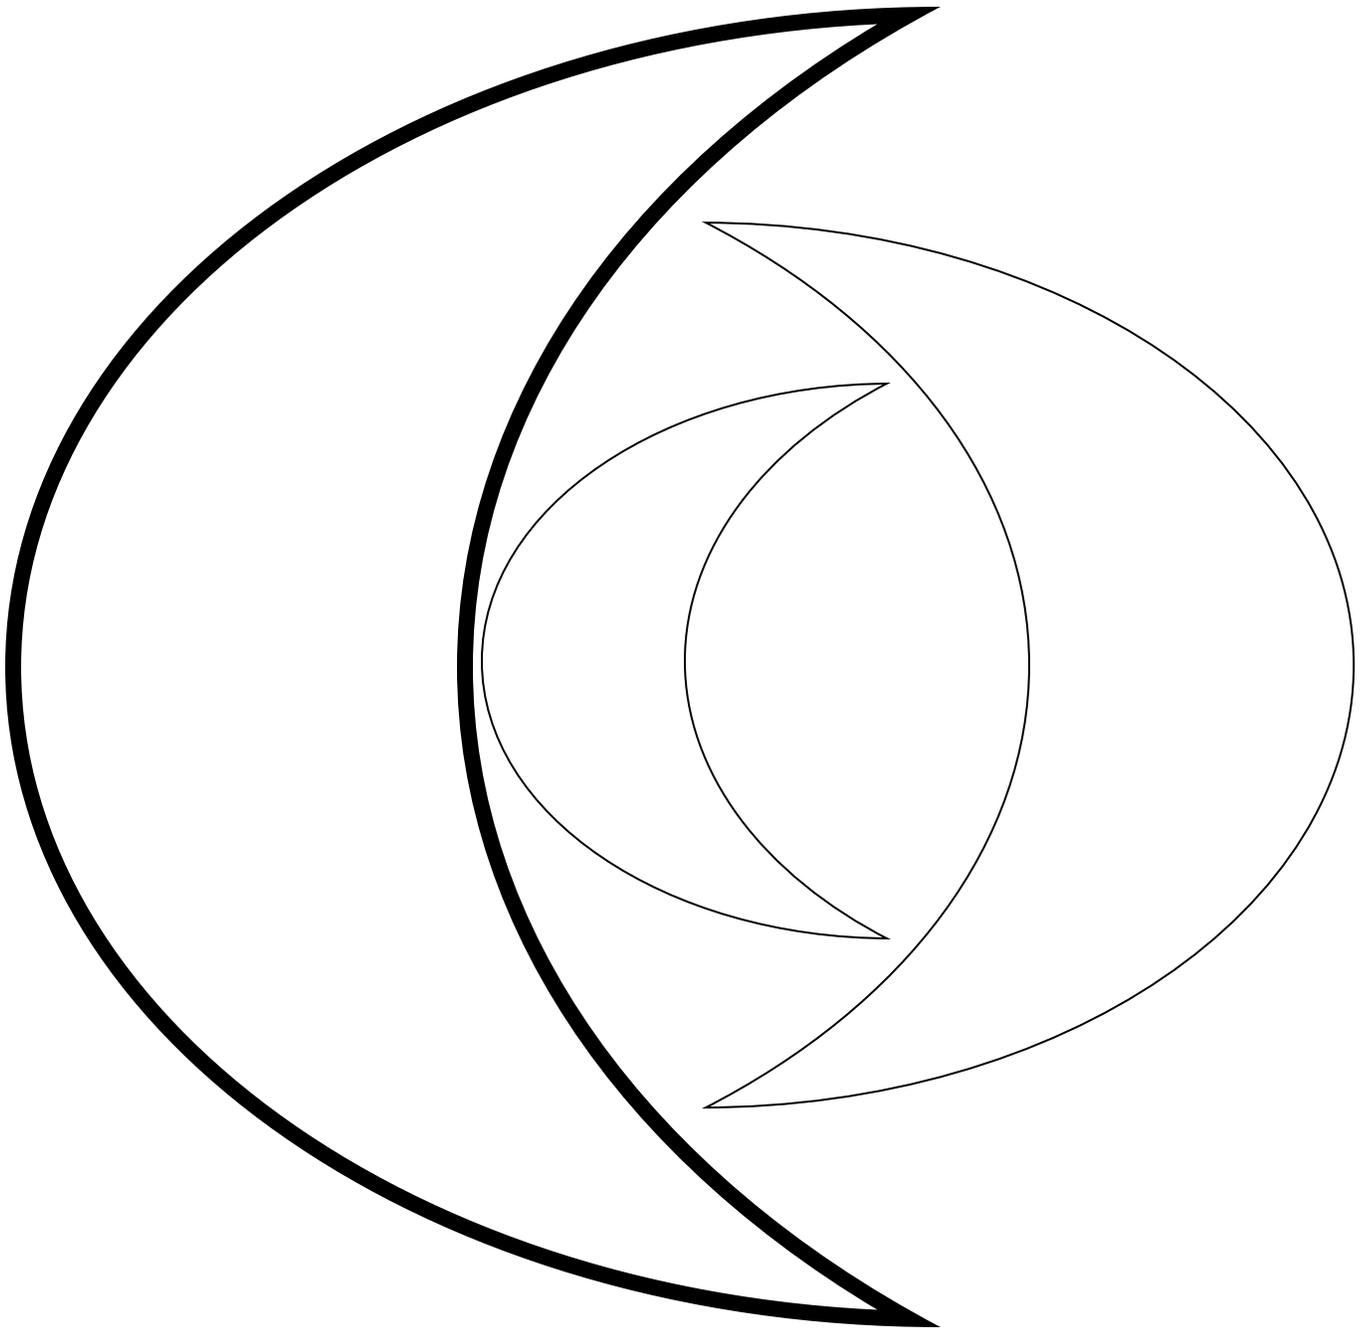

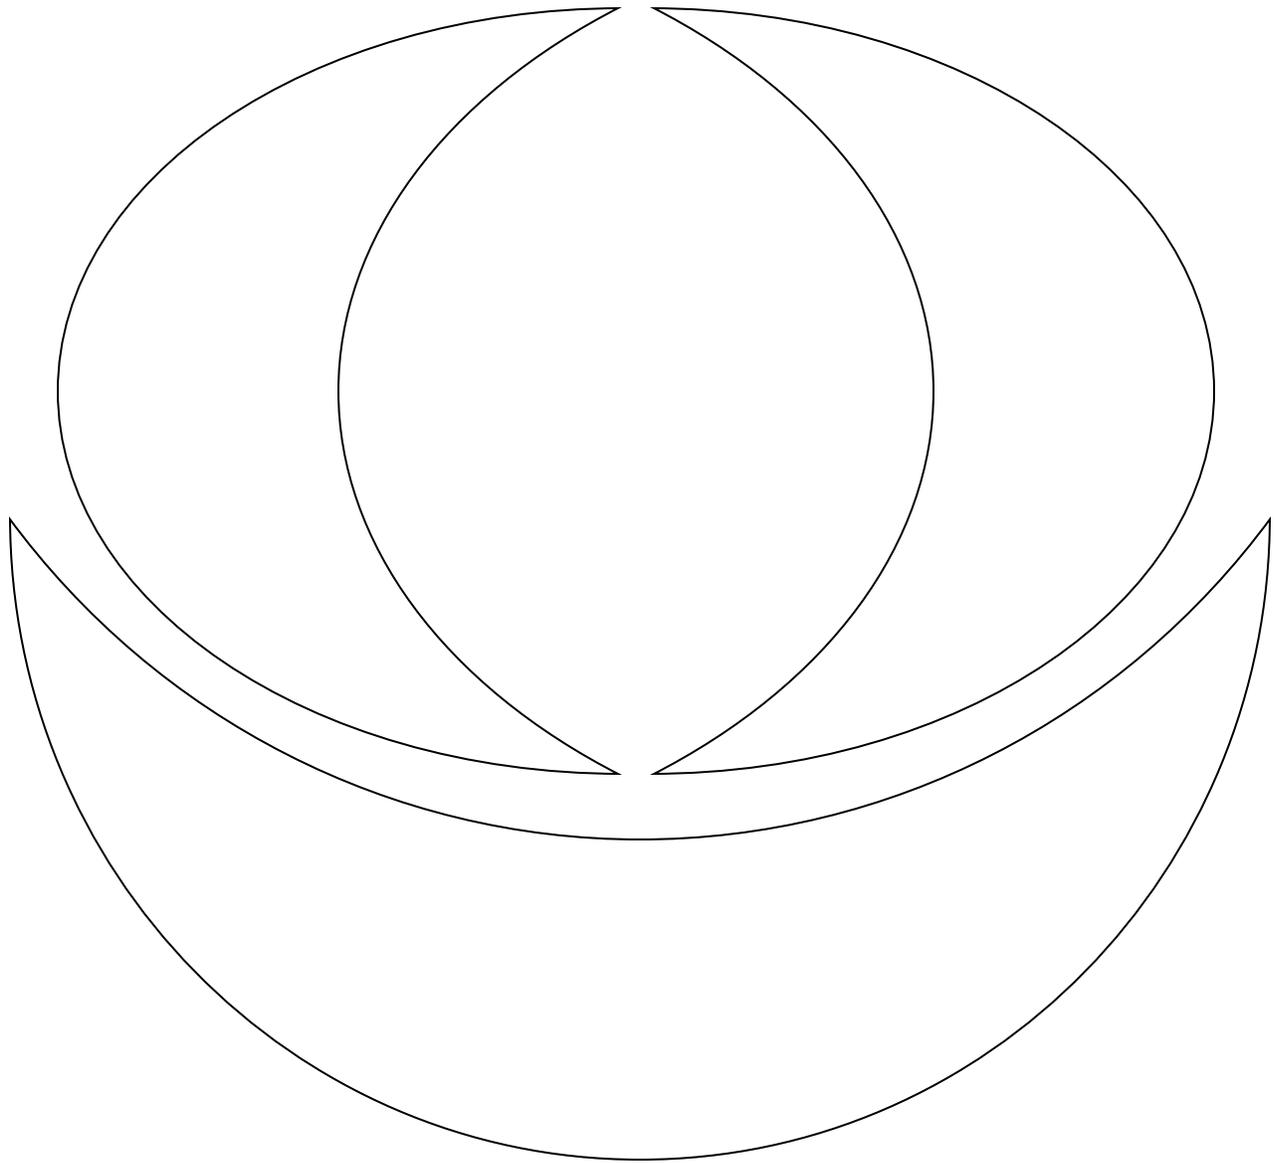

The Earth's tides
are controlled by
the Moon...

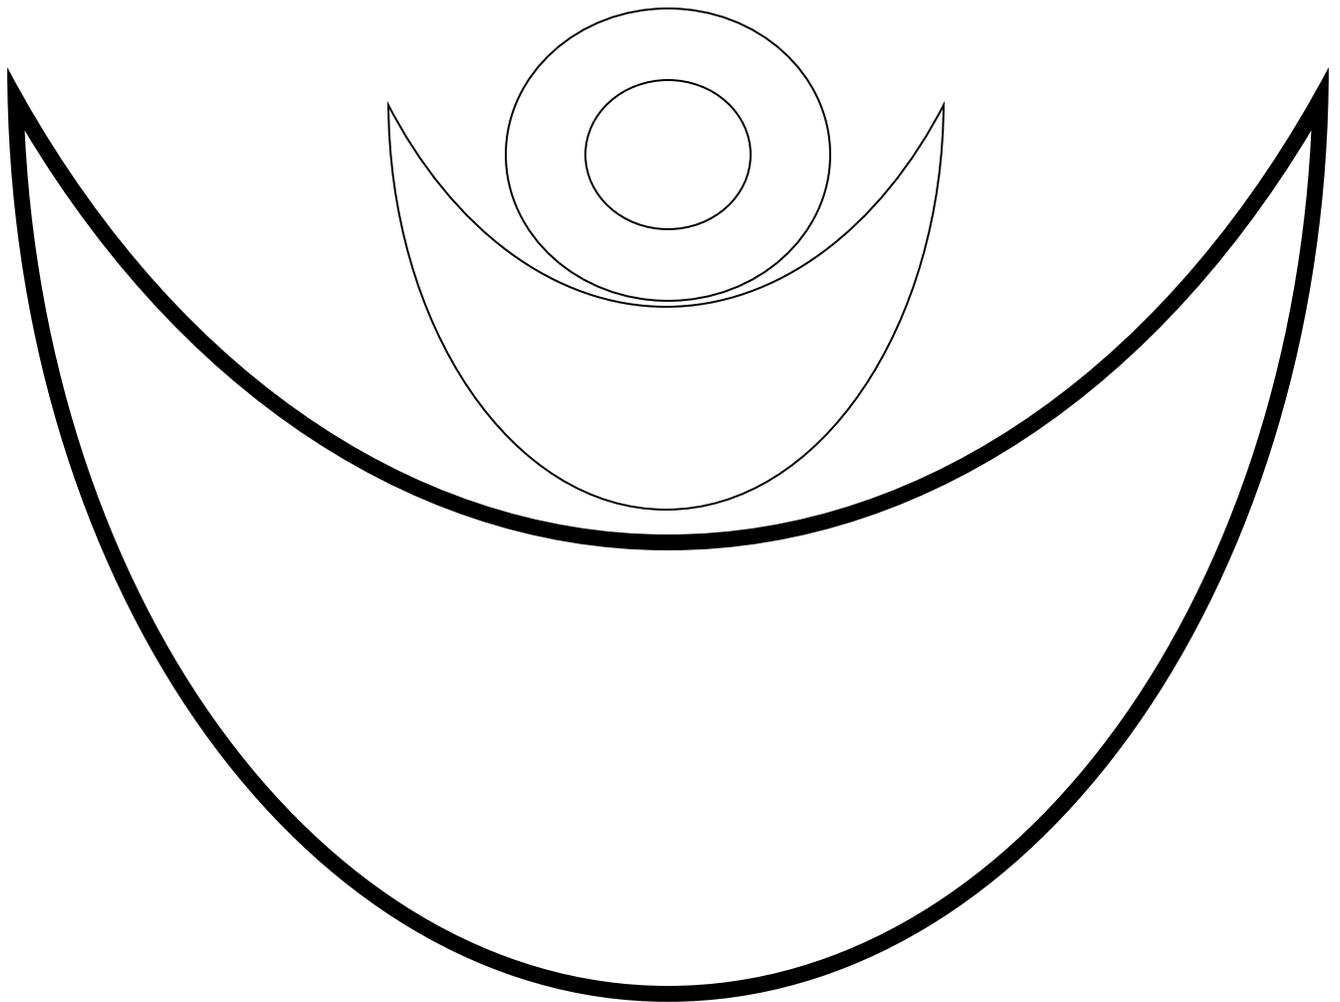

The Moon is moving away from Earth. About 4 cm (1.6'') each year.

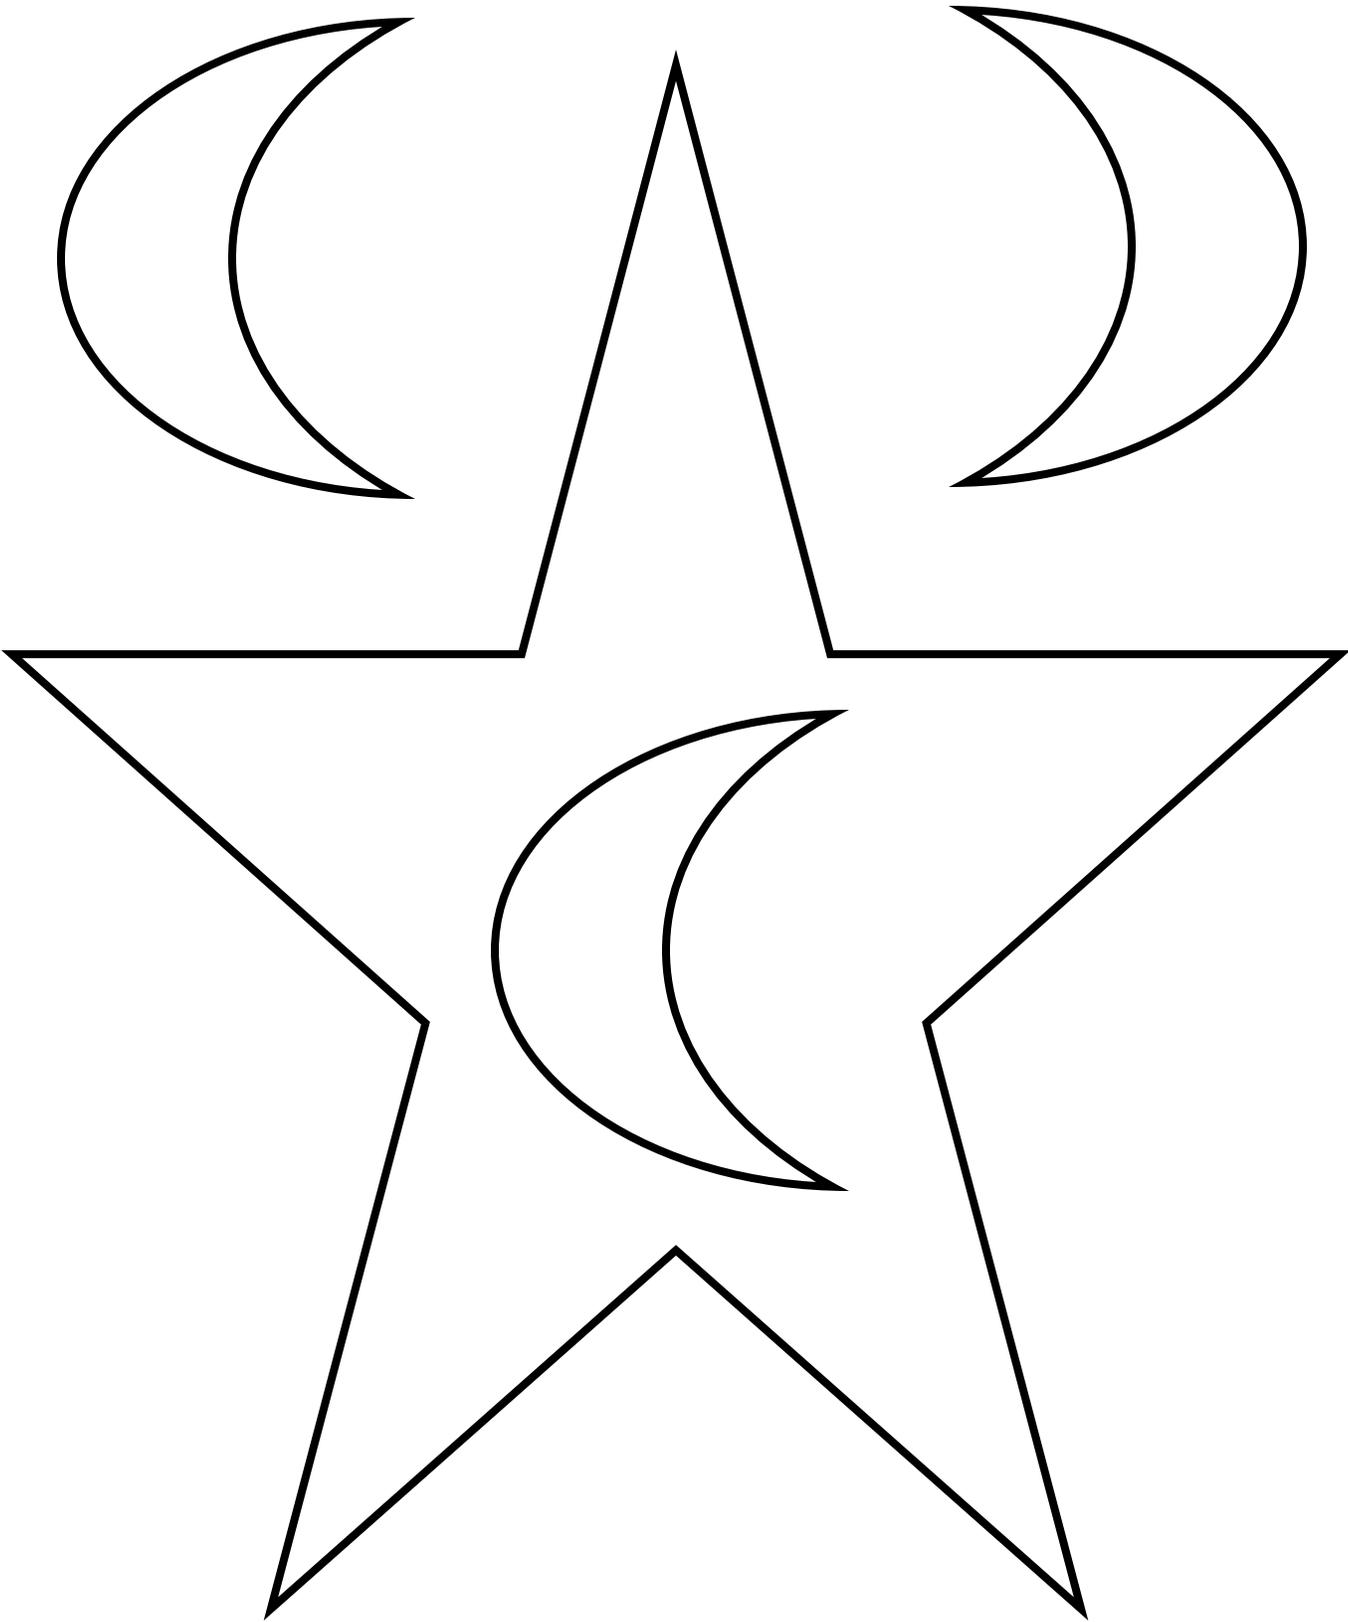

A man weighs much less on Moon than on Earth due to low gravity...

The sky on the Moon always appears black because no atmosphere is present...

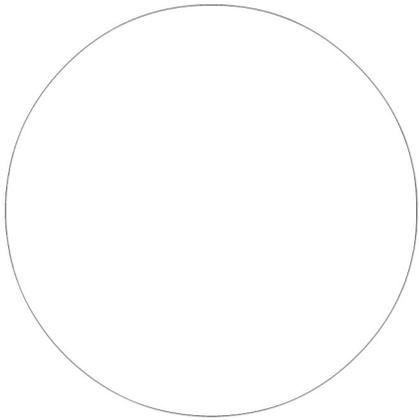

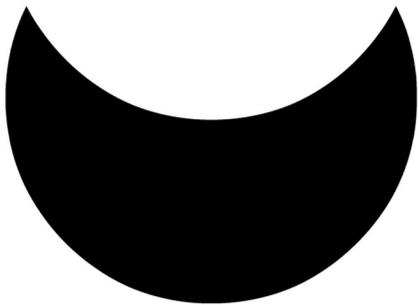

The Four Moon Phases

North Hemisphere

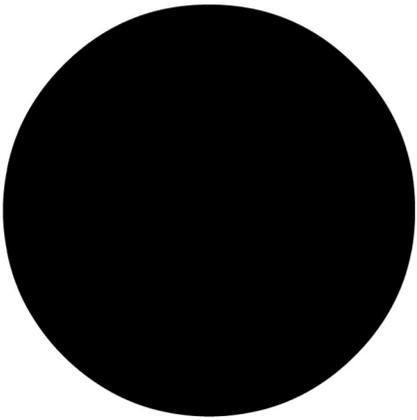

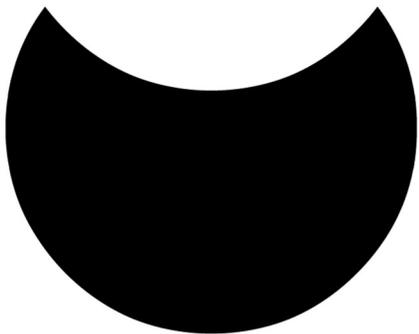

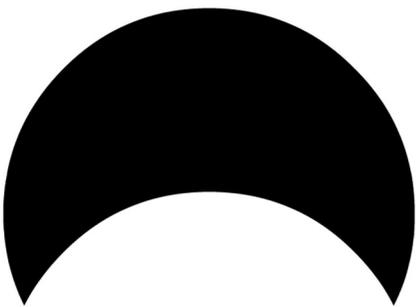

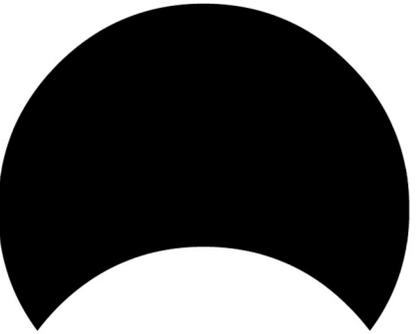

New Moon

First Quarter

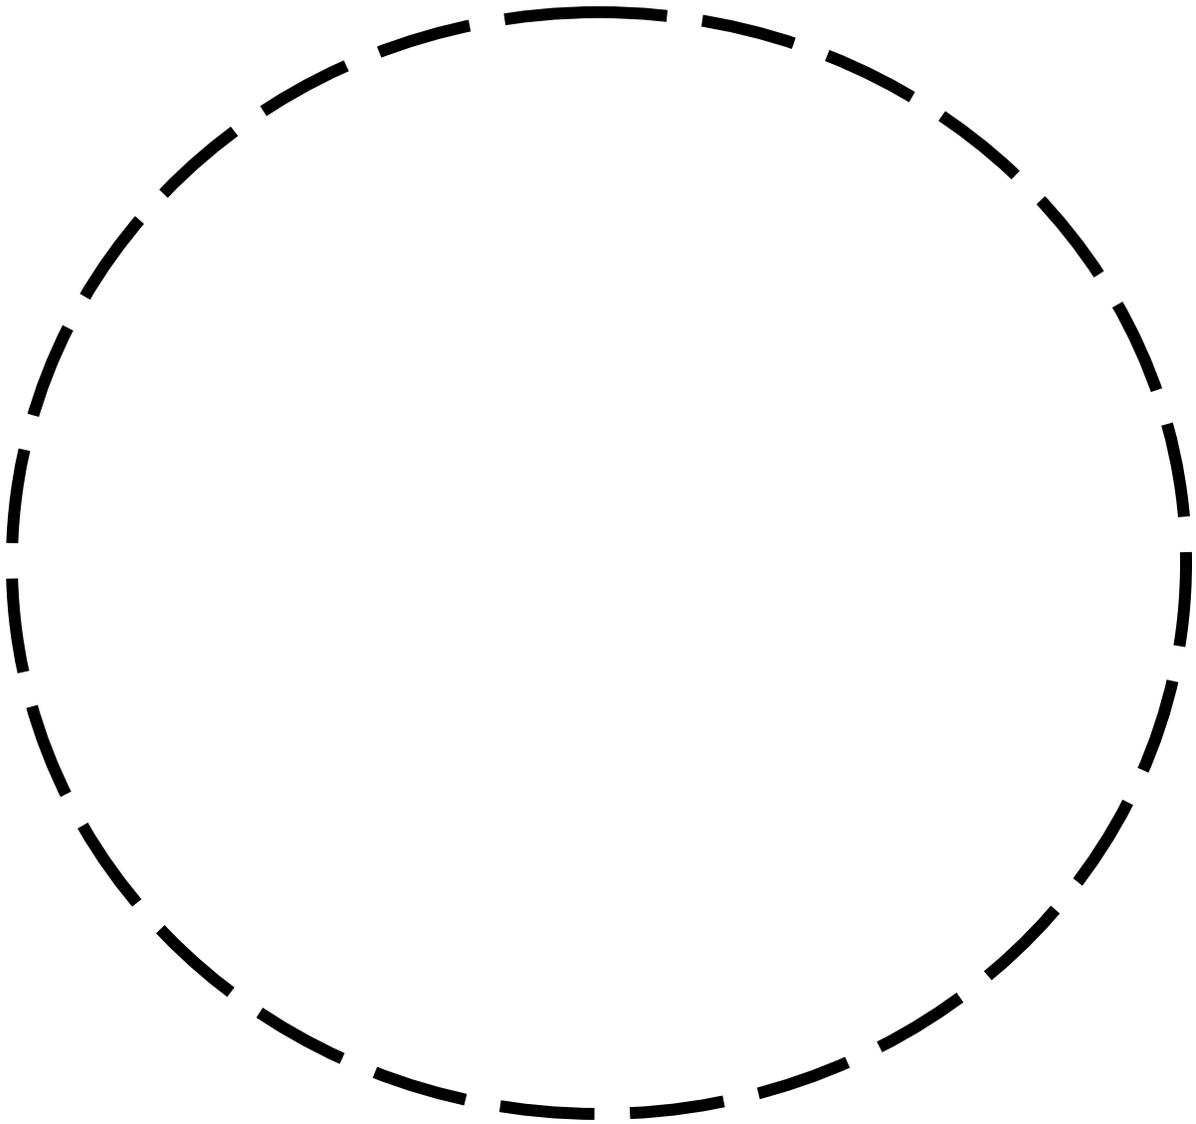

Full Moon

Last Quarter

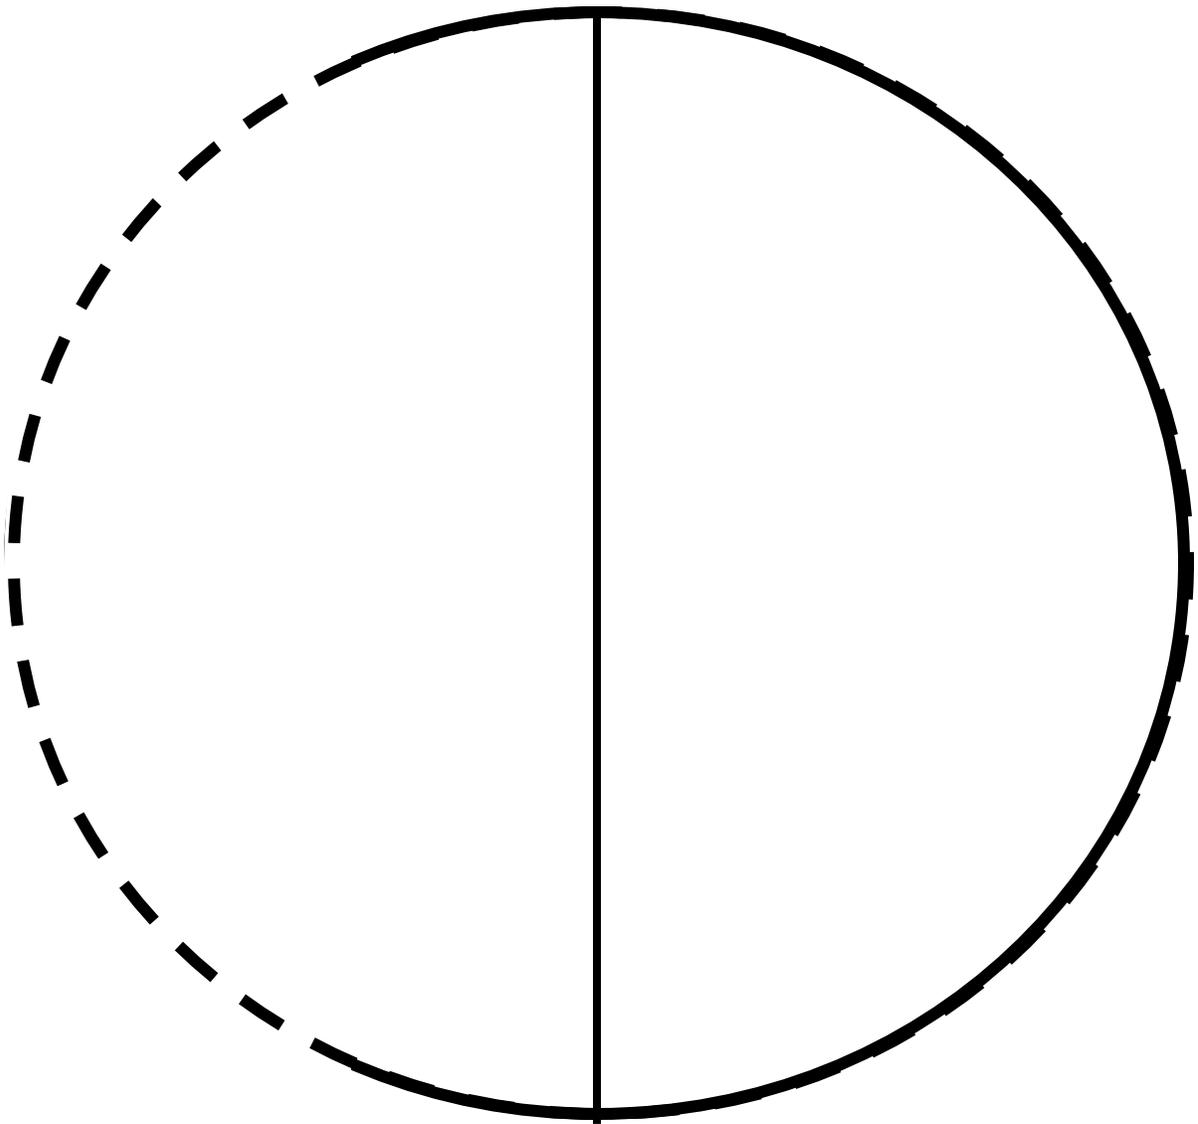

New Moon (0 days)

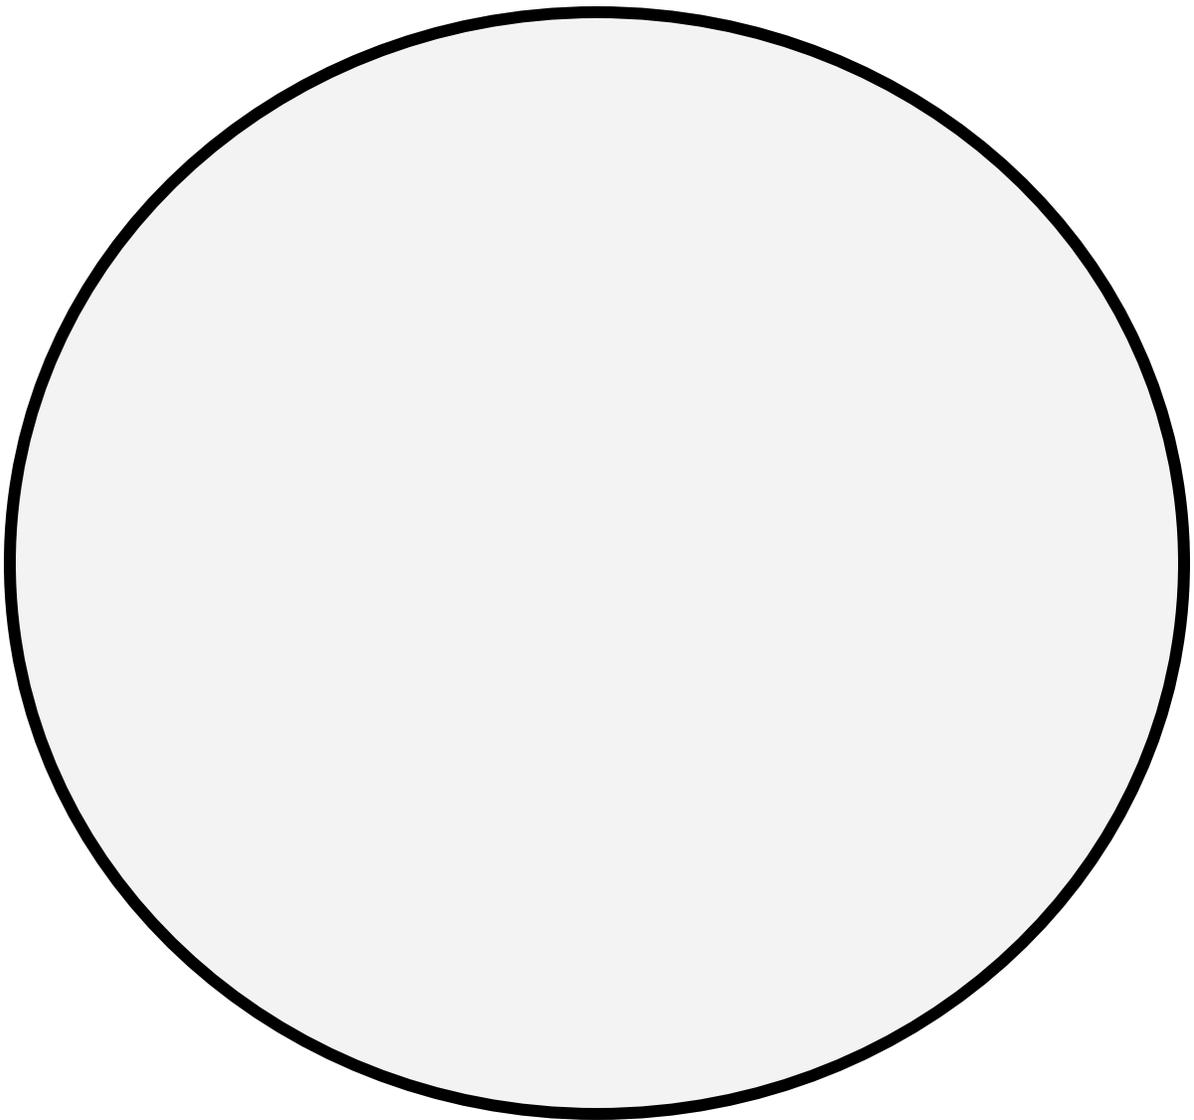

First Quarter Moon
(7-8 days)

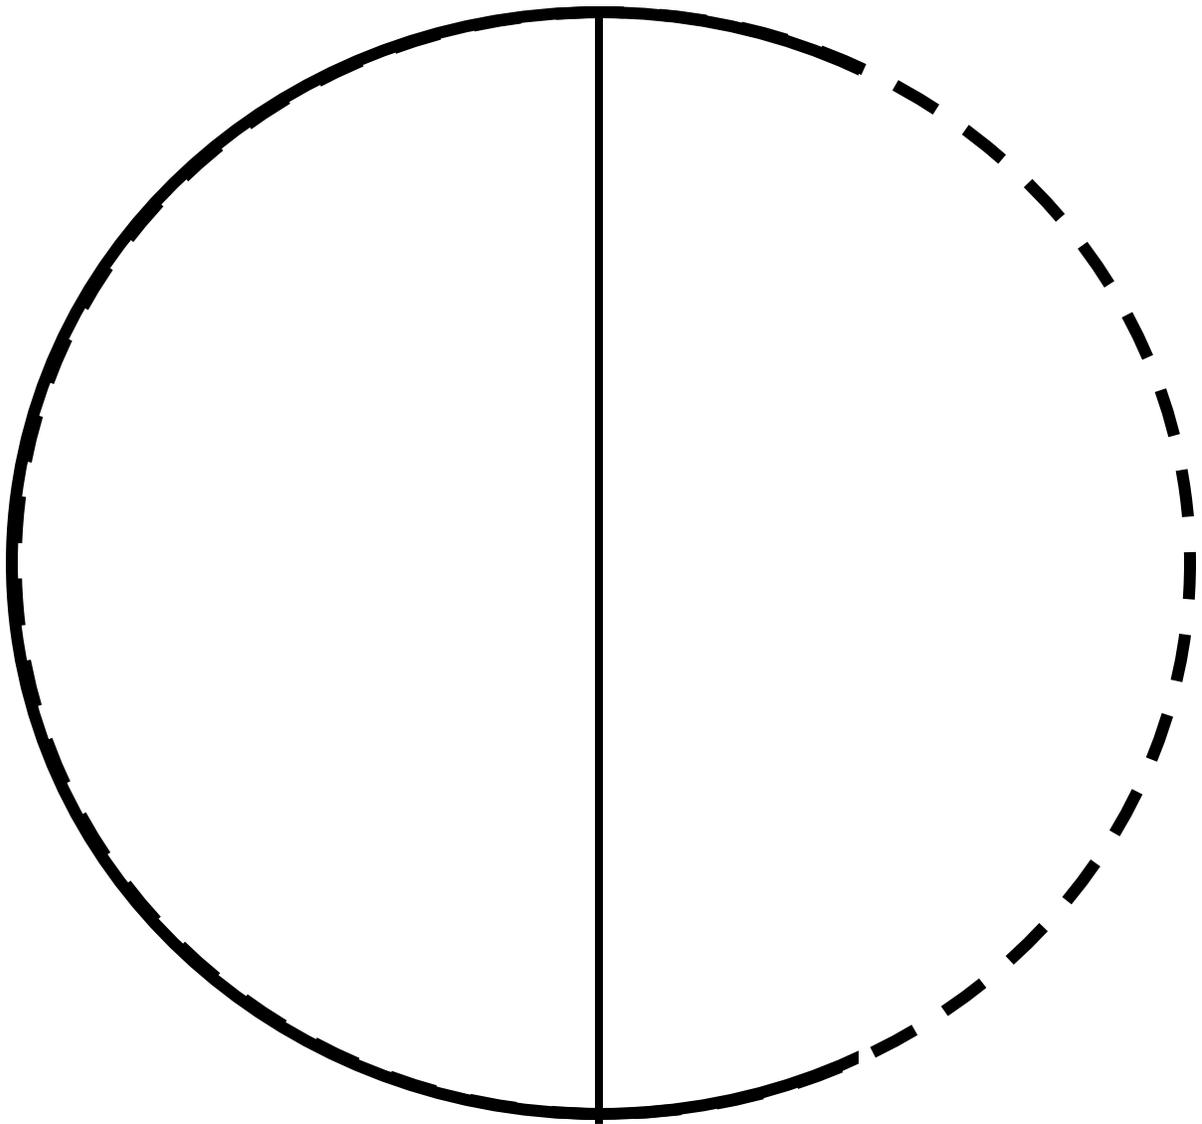

Full Moon (14-16 days)

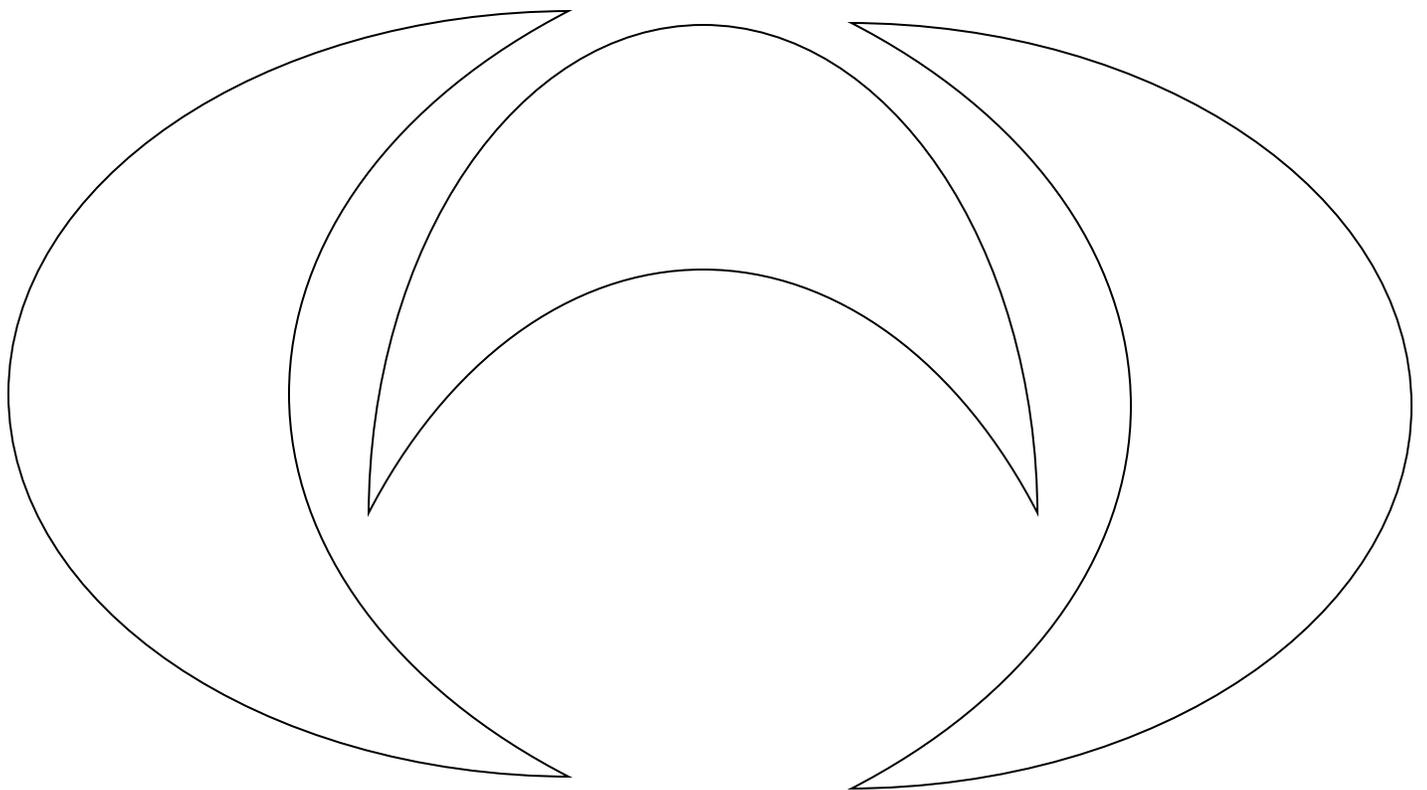

Last Quarter Moon
(21-22 days)

New Moon and First Quarter Moon are ideal times for new beginnings, new ideas etc. During Full Moon the energy is abundant (we should seize each day). During Last Quarter Moon we get rid of unwanted things, people, situations etc.

The Greek Mythology refers to Artemis as the Moon Goddess of the Ancient times. Ancient Greeks also honored Hecate as a second Moon Goddess...
